    <h1>The Machine Stops by E. M. Forster (1909)</h1>

    <div class="article-container">
      <div class="article-text">
        <p class="first-paragraph">
          Within the massive apparatus in E. M. Forster's take on
          the smart home, each individual lives in an
          underground room that meets all their physical needs
          and communicates with other humans via a
          technology akin to video calls. Most characters are
          perfectly happy to live out their days in isolation,
          although some insist on travelling through the hostile
          environment outside in order to meet face to face.
          Eventually, the first perspective wins out. But when
          the machine finally breaks down, its cocooned
          inhabitants face the end of the world.
        </p>
        <p>
          More than a hundred years after this story was first
          published, it feels incredibly prescient. In 2020, I sat
          in my apartment in front of a glowing computer
          screen, my friends and coworkers reduced to
          rectangles in a videoconference app, and I felt the
          walls of the machine surround me. I felt them again
          last year, when the air was so tainted with wildfire
          smoke that the horizon turned orange and any New
          Yorker who was able retreated indoors once again. As
          Forster predicted, the machine can be comforting in
          the face of an unsafe world – and at the same time, it's
          so stifling that it makes us long for even "scraps" of
          the open sky. Sophie Bushwick

                <p>
                    Shirley Jackson is author of one of the scariest novels
                    in the world (The Haunting of Hill House) and one of
                    the most brilliantly unsettling (We Have Always Lived

```

in the Castle). So it is only to be expected that she would also be the author of one of the most quietly disturbing speculative short stories ever written, The Lottery. It takes place in a nondescript rural village, where the locals are gathering for the lottery. It sounds like it's going to be fun. Kids are collecting stones. Everyone knows what is going to happen; they don't think much of neighbouring villages who have got rid of their lotteries ("Listening to the young folks, nothing's good enough for them. Next thing you know, they'll be wanting to go back to living in caves"). But a trickle of unease begins to spread, as the lottery "draw" looms nearer. If you don't know what the twist is, I won't spoil it, but I just read this again and I still feel a little shaky. Jackson is a stone-cold genius.

Alison Flood

        <div class="title">The pedestrian :-by Ray Bradbury(1951)</div>
        <div class="content">
            <p>If a dystopian story where cars dominate cities, people spend sedentary evenings gazing at screens and AI-powered police robots fail to grasp human motivations was published today it may come across as over-egged. But Bradbury's The Pedestrian is 73 years old.</p>

            <p>Its protagonist, Leonard Mead, is hauled away to an institution by a driverless police car that can't fathom why he'd be strolling at night with no purpose. The incident is mentioned in Bradbury's later novel Fahrenheit 451, suggesting that they inhabit the same world, and the idea reportedly came to him when he was interrogated by police for walking in Los Angeles in 1949.</p>

            <p>Things don't get much more dystopian than reframing a post-dinner stroll as a rebellious act, but the story has valuable messages about the society we have since constructed that is increasingly difficult to navigate without technology and how we maintain humanity in the face of progress. And the unflinching AI that refuses to accept Mead's explanation should give us all pause for thought as we entrench large language models into every aspect of our lives.</p>

      <div class="content">
        <p>The enigmatic dystopian novel, "Who Have Never Known Men" by Jacqueline Harpman
has haunted me since I finished it. It opens with 39 women and one girl who have been locked in a
cage underground for an unknown number of years, closely watched by three guards at all times.
None know how they got there. Then one day, as the guards are delivering food, an alarm goes off
and the guards run off in a panic, leaving a hatch unlocked. The women make their escape into... well,
I won't spoil it for you. The stark prose and use of repetition in the wrong hands would be dull, but
Harpman uses them to great effect in this unsettling meditation on the meaning of life and
community, hope and hopelessness and the effects of captivity. But be warned: if you like your fiction
to be tied up in a neat bow, then this isn't one for you.</p>

            <div class="content">
                <p>Before stories such as Dark, Looper, Back to the Future and Doctor Who, Robert Heinlein delivered one of the most memorable time travel paradoxes ever conceived in his 1958 short story All You Zombies. But don't be fooled by the title – there are no shambling hordes of the walking dead to be found. Instead, the story begins with a bartender serving up shots to a customer while coaxing the latter into sharing their personal circumstances and incredible life story. It is a standard storytelling scene with a twist that is telegraphed in the opening paragraph, because the bartender is actually a temporal agent recruiting the customer to join a shadowy organisation that manipulates the timeline through time travel. Before long, the conversation takes some unexpected but increasingly personal turns for both people. Heinlein supposedly wrote.</p>
